

## INDEX

- A**CIDS, action of, on cell division, 347.  
Activity, voluntary, effect of castration on, 324.  
**A**DDIS, T., B. A. MEYERS and L. BAYER. The regulation of renal activity. XI. The rate of phosphate excretion by the kidney, 125.  
**A**DOLPH, E. F. Alkalosis produced by ingesting urea, 185.  
—. The chemical sensitiveness of the kidneys, 186.  
Adrenal medulla, rôle of, in pseudaffectionate hyperglycemia, 295.  
Adrenalectomy, response to occlusion of head arteries after, 200.  
Adrenalin, blood pressure and intestinal response to, 314.  
**A**GASSIZ, A. See DRINKER and AGASSIZ, 151.  
Alanine, rôle of, in synthesis of tryptophane, 260.  
Albuminuria, production of, by renal vasoconstriction, 184.  
Alkalosis produced by ingesting urea, 185.  
Amino acids in nutrition, 260.  
**A**NDERSON, J. E. See SMITH and ANDERSON, 209.  
Anemia, blood regeneration in, 395, 408, 419, 431.  
Anoxemia, progressive, in animals with denervated heart, reactions to, 194.  
Aortic regurgitation, experimental, further observations on, 201.  
Arsenic, penetration of, effects of internal and external pH on, from arsenite and arsenite solutions into a living cell, 222.  
**A**USTIN, W. C. See BOYD and AUSTIN, 207.
- B**ALD, F. W. See GESELL, BRONK, McGINTY, HERTZMAN, BALD, LASHMET and MONTGOMERY, 233.
- B**ALDWIN, F. M. Body temperature changes in turtles and their physiological interpretations (*Chrysemys marginata bellii*) (Gray) (*Chelydra serpentina*) (Linn), 210.  
—. See NELSON, BALDWIN, RIGGS and CUNNINGHAM, 69.  
**B**ARBOUR, H. G., W. F. HAMILTON, M. H. DAWSON and I. NEUWIRTH. Mobilization of salt and water before sweating, as determined by the specific gravity: solids ratio of blood and serum, 232.  
**B**ARLOW, O. W. and T. SOLLMANN. Deceptive effects of extracts of suprarenal cortex. Cardiac effect produced by potassium content; intestinal effects due to epinephrin and choline, 343.  
**B**AUAMANN, E. J. See MARINE, BAUMANN and CIPRA, 248.  
**B**AYER, L. See ADDIS, MEYERS and BAYER, 125.  
**B**AZETT, H. C. Further observations on experimental aortic regurgitation, 201.  
**B**ERCOVITZ, Z. Studies on the motility of the denervated Heidenhain pouch, 109.  
**B**EST, C. H. and J. H. RIDOUT. Observations on blood lactic acid after insulin, 196.  
**B**INGER, M. W. See GUENTHER and BINGER, 226.  
**B**ISHOP, G. H., J. ERLANGER and H. S. GASSER. Data on the nature of propagation in nerve, 199.  
—. See ERLANGER, BISHOP and GASSER, 197.  
Blood cells, normal and sensitized, surface composition of, 202.  
— clotting, two physiological mechanisms for, 204.  
— coagulation in normal humans, effects of spleen and marrow extracts on, 227.

- Blood flow, rate of, as determined by a new method, 216.  
 —— lactic acid after insulin, 196.  
 —— plasma and erythrocytes, distribution of glucose in, 76.  
 —— pressure and intestinal response to adrenalin, 314.  
 —— ——, blood volume and, in anaphylactic and peptone shock, 1.  
 —— —— in arm and leg in normal subjects, 169.  
 —— regeneration in severe anemia, 395, 408, 419, 431.  
 —— sugar, irritability and, 213.  
 —— volume and blood pressure in anaphylactic and peptone shock, 1.
- BLUMGART, H. L. and O. C. YENS. The rate of blood flow as determined by a new method, 216.
- BOLLMAN, J. L., F. C. MANN and T. B. MAGATH. Studies on the physiology of the liver. X. Uric acid following total removal of the liver, 629.
